企业简介

品质打造品牌 服务提高信誉

浙江浙起机械有限公司专注从事“浙起机械”系列起重机及其它专用智能起重机。公司注重研发，是一家集设计、开发及制造起重运输装卸机械于一体的企业，现具有国家颁发的特种设备生产许可证，通过了ISO14001:2015环境管理体系认证、ISO9001:2015质量管理体系认证、ISO45001:2018职业健康安全管理体系认证。

公司拥有经验丰富的专业技术人员，技术力量雄厚，设计先进、工艺合理，建立了完善的质量检测系统，严格按照国家标准，从原材料进厂到成品出售均有严密的质量控制，使各个工序的产品质量都在受控范围内。企业全面推行现代化管理以及文明生产、用户至上的方针，建立完善的售后服务体系。公司秉承“信誉为先、用户至上、共创价值”的管理理念，紧密围绕用户需求，和用户共创价值。我公司始终重视并持续坚持技术创新，聚焦起重机的智能化升级与发展，根据不同的使用场景对起重机进行智能化升级。

公司实力雄厚，下设市场部，生产部，质检部、工程部，技术部，售后服务部等专设部门。为客户提供生产、安装、调试、售后的全面技术保障。运用现代生产管理模式，强化生产过程中的规范操作和流程，准确及时的产品制造。项目实施时，相关部门制定详细落实本项目的各项方案(技术方案、采购方案、配套外协方案、生产方案、运输方案、安装方案等)并制定进度表，有序进展，客户项目的交付。

Zhejiang Zheqi Machinery Co., Ltd. specializes in "Zheqi Machinery" series cranes and other special intelligent cranes. The company pays attention to research and development. It is an enterprise integrating the design, development and manufacturing of lifting, transportation and handling machinery. Now it has a special equipment production license issued by the state, and has passed the ISO14001:2015 environmental management system certification, the ISO9001: 2015 quality management system certification, and the ISO45001: 2018 occupational health and safety management system certification.

The company has experienced dedicated technicians with strong technical force, advanced design and reasonable process, and has established a perfect quality inspection system. In strict accordance with national standards, the company has strict quality control from raw materials entering the factory to the sale of finished products, so that the product quality of each process is under control. The enterprise fully implements the policy of modern management, civilized production and customer first, and establishes a perfect after-sales service system. The company adheres to the management philosophy of "reputation first, user first, and value creation", closely focusing on user needs and creating value with users. Our company always attaches importance to and continues to adhere to technological innovation, focuses on the intelligent upgrading and development of cranes, and intelligently upgrades cranes according to different use scenarios.

The company has strong strength, including marketing department, production department, quality inspection department, engineering department, technology department, after-sales service department and other dedicated departments. Provide customers with comprehensive technical support for production, installation, commissioning and after-sales. Use modern production management mode, strengthen the standardized operation and process in the production process, and make products accurately and timely. During the implementation of the project, the relevant departments shall formulate various schemes (technical scheme, procurement scheme, supporting outsourcing scheme, production scheme, transportation scheme, installation scheme, etc.) for the detailed implementation of the project, formulate a schedule, make orderly progress, and deliver the customer's project.

企业文化【诚信为本、敬业奉献、追求卓越、创造无限】

Corporate culture is based on honesty, dedication, pursuit of excellence, and infinite creativity

企业精神【敬业、团队、创新】

Corporate spirit, dedication, teamwork, and innovation

经营理念【诚实务实、以客为先】

Business philosophy: Honest and pragmatic, customer-oriented

竞争策略【制造良好的产品、提供良好的服务创建良好的口碑】

Competitive strategy creates good products, provides good services, and creates a good reputation

品牌优势

先进设备 高效生产 确保产品质量

公司实力

公司成立于2001年，是一家起重机及物料搬运产品的专业制造和服务供应商。

致力于起重机及物流搬运技术的发展和研究，采用新理念，开发新产品，不断追求工业进步，引领行业的发展。

Company strength

Founded in 2001, the company is a professional manufacturer and service provider of cranes and material handling products. Committed to the development and research of crane and logistics handling technology, adopt new concepts, develop new products, constantly pursue industrial progress, and lead the development of the industry.

设备研发

公司始终重视并持续坚持技术创新，聚焦起重机的智能化升级与发展，根据不同的使用场景对起重机进行智能化升级。

目前已经具备适用于多个行业的无人化行车系统和适用于固废处置行业的远程高级半自动系统。

Equipment research and development

The company has always attached importance to and continued to adhere to technological innovation, focused on the intelligent upgrading and development of cranes, and carried out intelligent upgrading of cranes according to different use scenarios.

At present, there are unmanned driving systems applicable to multiple industries and remote advanced semi-automatic systems applicable to the solid hazardous waste disposal industry.

产品性能

公司拥有经验丰富的专注技术人员，技术力量雄厚，设计先进、工艺合理，建立了完善的质量检测系统，严格按照国家标准，从原材料进厂到成品出售均有严密的质量控制，使各个工序的产品质量都在受控范围内。

Product performance

The company has experienced dedicated technicians with strong technical force, advanced design and reasonable process, and has established a perfect quality inspection system. In strict accordance with national standards, the company has strict quality control from raw materials entering the factory to the sale of finished products, so that the product quality of each process is under control.

客户服务

公司下设市场部，生产部，质检部、工程部，技术部，售后服务部等，为客户提供生产、安装、调试、售后的全面技术保障。

运用现代生产管理模式，强化生产过程中的规范操作和流程，准确及时的产品制造。

Customer service

The company has a marketing department, production department, quality inspection department, engineering department, technology department, after-sales service department, etc. to provide customers with comprehensive technical support for production, installation, commissioning and after-sales.

Use modern production management mode, strengthen the standardized operation and process in the production process, and make products accurately and timely.

工业数字化解决方案

Professional manufacturer of garbage grab cranes
Industrial digital solutions

产品中心

公司主要有垃圾抓斗起重机、灰渣抓斗起重机、通用桥式起重机、电动单梁起重机、电动葫芦等不同种类的起重设备，可为您提供多种起升方案。

The company mainly has different types of lifting equipment, such as garbage grab cranes, ash grab cranes, universal bridge cranes, electric single beam cranes, electric hoists, etc. We can provide you with various lifting solutions.

结构新颖 省时省力

具有场地利用率高，作业范围大，适应面广，通用强，低噪音。

New structure saves time and labor

It has the advantages of high site utilization, large operation range, wide adaptability, strong versatility and low noise.

性能优良 起重量大

作业效率高，占用空间小，工作范围大，适用于多种作业环境。

Excellent performance, large lifting capacity

High operation efficiency, small space occupation, large working range, suitable for a variety of operating environments.

垃圾抓斗起重机 >> Garbage grab crane

- 抓取发酵后的生活垃圾，进行投料用于焚烧。
- 垃圾车卸车入仓后，进行倒料，堆料，拌料。
- Grab the fermented household waste and feed it for incineration.
- After the garbage truck is unloaded and stored, it is used for dumping, stacking, and mixing.

固废抓斗起重机 >> Solid waste grab crane

用于固体废弃物，建筑废弃物，污泥/油泥的抓料，投料。

Used for grabbing and feeding solid waste, construction waste, sludge/oil sludge.

工业数字化解决方案
Professional manufacturer of garbage grab cranes
Industrial digital solutions

餐厨抓斗起重机 >> Kitchen grab crane

· 抓斗上设置有多斗齿，在抓取餐厨垃圾时对餐厨垃圾进行破碎处理。

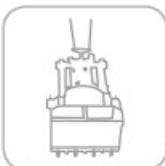

· 可以有效降低后续处理工艺的压力，降低餐厨垃圾的处理成本。

· The grab bucket is equipped with multiple teeth to crush and dispose of kitchen waste when grabbing it.
· It can effectively reduce the pressure of subsequent treatment processes and reduce the cost of treating kitchen waste.

灰渣抓斗起重机 >> Ash grab crane

- 垃圾焚烧后的废渣抓取，装车。
- 出渣口清运。
- Grab and load the waste residue after incineration.
- Clean and transport the slag outlet.

专业垃圾抓斗起重机制造商
工业数字化解决方案
Professional manufacturer of garbage grab cranes
Industrial digital solutions

干燥抓斗起重机 >> Dry coal grab crane

- 从事矿石、石灰石、矿粉、焦炭、煤砂等散粒物的搬运工作。
- 容量大，承载力高
- Engaged in the handling of loose particles such as ore, limestone, mineral powder, coke, coal sand, etc.
- Large capacity and high bearing capacity

危废抓斗起重机 >> Hazardous waste grab crane

用于室内工业危险废弃物，医疗废弃物的抓取，破碎，焚烧。

Used for the capture, crushing, and incineration of indoor industrial hazardous waste and medical waste.

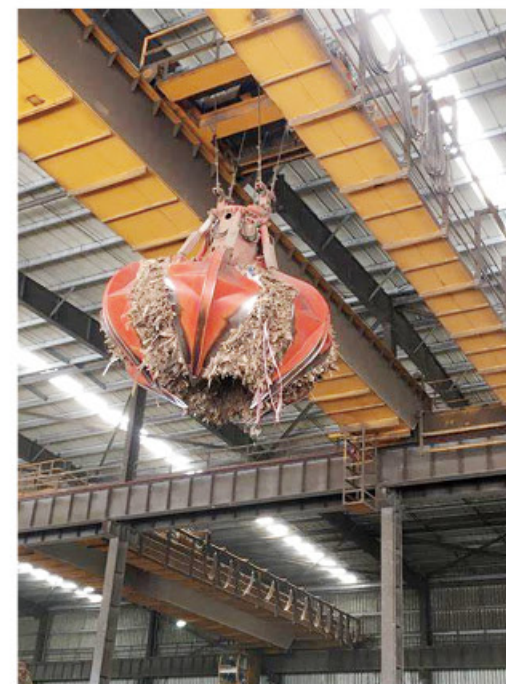

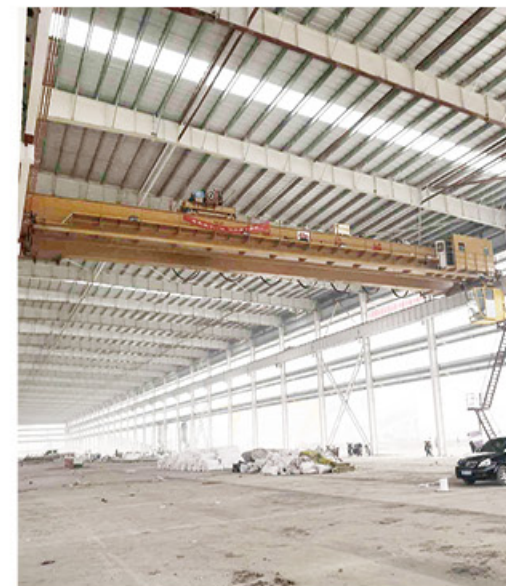

专业垃圾抓斗起重机制造商
工业数字化解决方案
Professional manufacturer of garbage grab cranes

秸秆抓斗起重机 >> Straw grab crane

秸秆抓斗主要抓取对象为各种秸秆类物料，该类物料具有体积大、重量轻的特点，如稻草、麦草、芦苇、龙须草、棉麻等。

The straw grab mainly grasps various types of straw materials, which have the characteristics of large volume and light weight, such as rice straw, wheat straw, reed, asparagus, cotton and hemp, etc.

通用桥式起重机 >> General purpose overhead crane

- 起重小车沿铺设在桥架上的轨道横向运行，充分利用桥架下面的空间吊运物料，不受地面设备的阻碍。
- 用于设备组装，吊装，检修。
- The lifting trolley runs horizontally along the track laid on the bridge, fully utilizing the space below the bridge to lift materials without being hindered by ground equipment.
- Used for equipment assembly, lifting, and maintenance.

仓储起重机 >> Storage crane

- 减少人力配置，节省仓库空间
- 自动化、无人化、远程化
- Reduce manpower allocation and save warehouse space
- Automation, unmanned, remote

电动葫芦 >> Electric hoist

用于设备组装，吊装，检修。

Used for equipment assembly, lifting, and maintenance.

数字化系统

科学、先进、可靠、可扩展的系统

三维智能 管理系统

3D intelligent management system

随着目前人工成本提高，对人员水平的要求提高，且环境恶劣，易燃易爆危险，设计智能化目标，系统依照IT-OT结合的设计思路，借鉴物联网智慧仓储设计理念，重点突出管理系统的科学性、先进性、可靠性与可扩展性。

With the current increase of labor costs, the requirements for personnel level are raised, and the environment is harsh, flammable and explosive, so the intelligent management goal is designed. The system follows the design idea of IT-OT combination, draws on the design concept of intelligent storage of the Internet of Things, and focuses on the scientificity, progressiveness, reliability and scalability of the management system.

AI工业视觉 场景系统

AI Industrial Visual Scene System

系统采用全网络数字视频监控架构，前端都采用高清网络摄像机进行视频采集，通过摄像机的网络端口直接接入到库区视频传输网络中，实现库区高清数字视频监控系统集中管理。

The system adopts a full network digital video monitoring architecture, and the front-end uses high-definition network cameras for video collection. It is directly connected to the video transmission network of the reservoir area through the network port of the camera, achieving centralized management of the reservoir area high-definition digital video monitoring system.

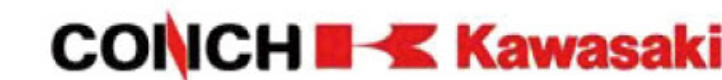

三维扫描点云系统

3D scanning point cloud system

三维扫描系统由三维激光扫描仪、图像处理服务器组成。对点云进行预处理，包括噪声过滤、遮挡物和超范围点去除等；然后对预处理点云进行拼接，并通过预设的安息角，进行盲区数据补充；生成指定间距的数字高程模型数据并进行网格化。

The 3D scanning system consists of a 3D laser scanner and an image processing server. Pre processing of point clouds, including noise filtering, occlusion, and removal of out of range points; Then concatenate the preprocessed point cloud and supplement the blind spot data through the preset rest angle; Generate digital elevation model data with specified spacing and grid it.
